## 【Preparation】

<Getting files>

Release Note: Streaming Setting Transfer V1.0.0 Release Note.pdf

Software zip archive : StreamingSettingTransferV100\_Win.zip (Windows edition),

StreamingSettingTransferV100\_Mac.zip (MacOS edition)

※Please get them from Software Download site

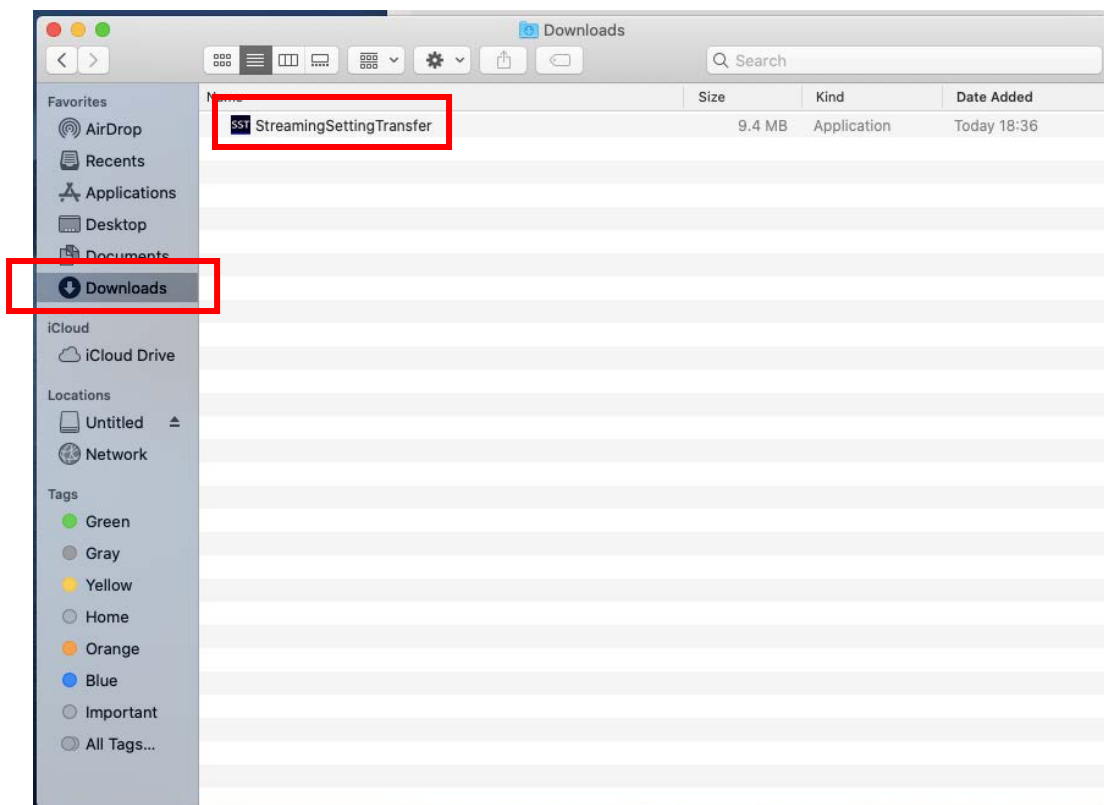

## 【The procedure to startup : Windows edition】

There is no dedicated installer. To start up, please decode the above-mentioned zip file under the any folder, then start StreamingSettingTransfer.exe by double-clicking it.

## 【The procedure to startup : MacOS edition】

There is no dedicated installer.

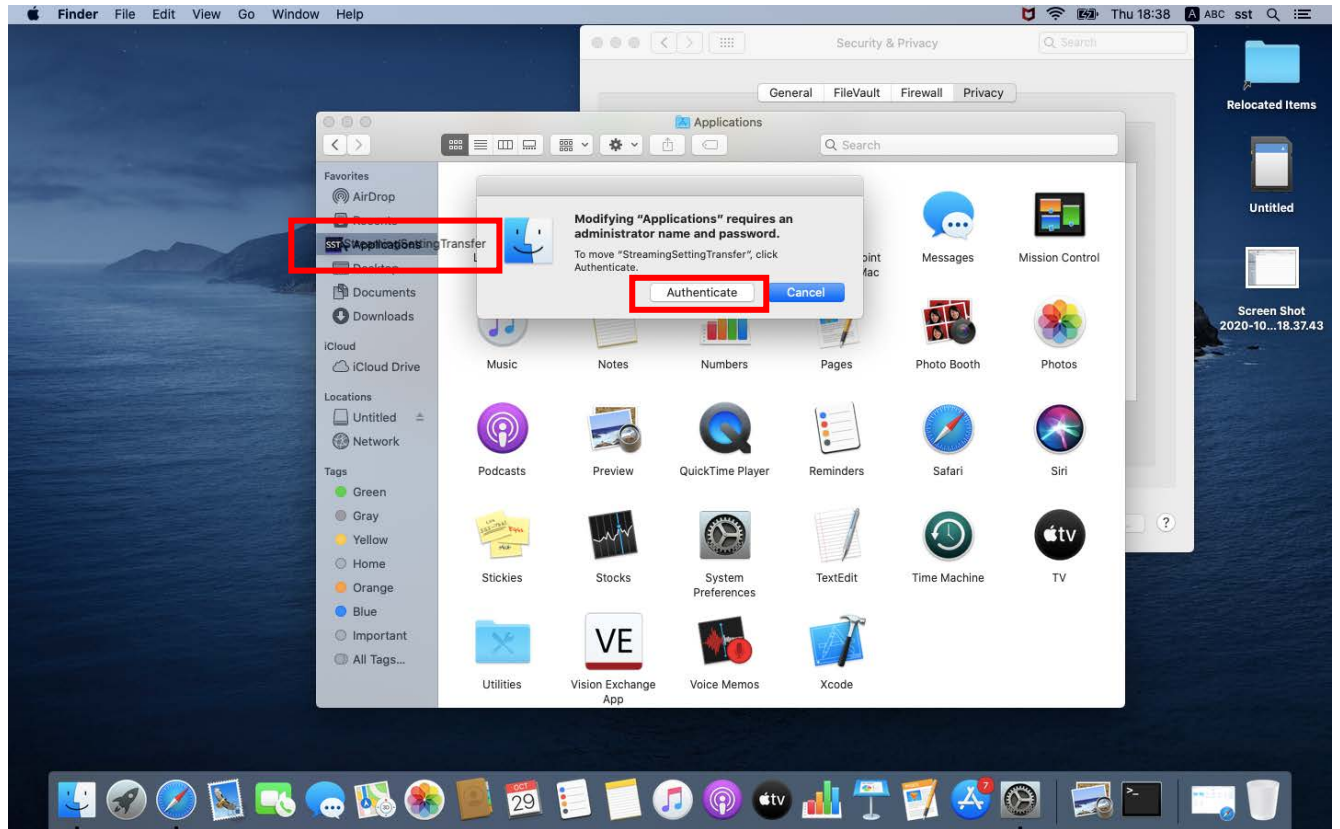

When the above-mentioned zip file is downloaded from the Software Download site by using the browser of MacOS directly, it is downloaded under the Downloads folder and decoded automatically as below.

When the zip file downloaded to the another PC is copied to the desktop of the MacOS PC by using USB

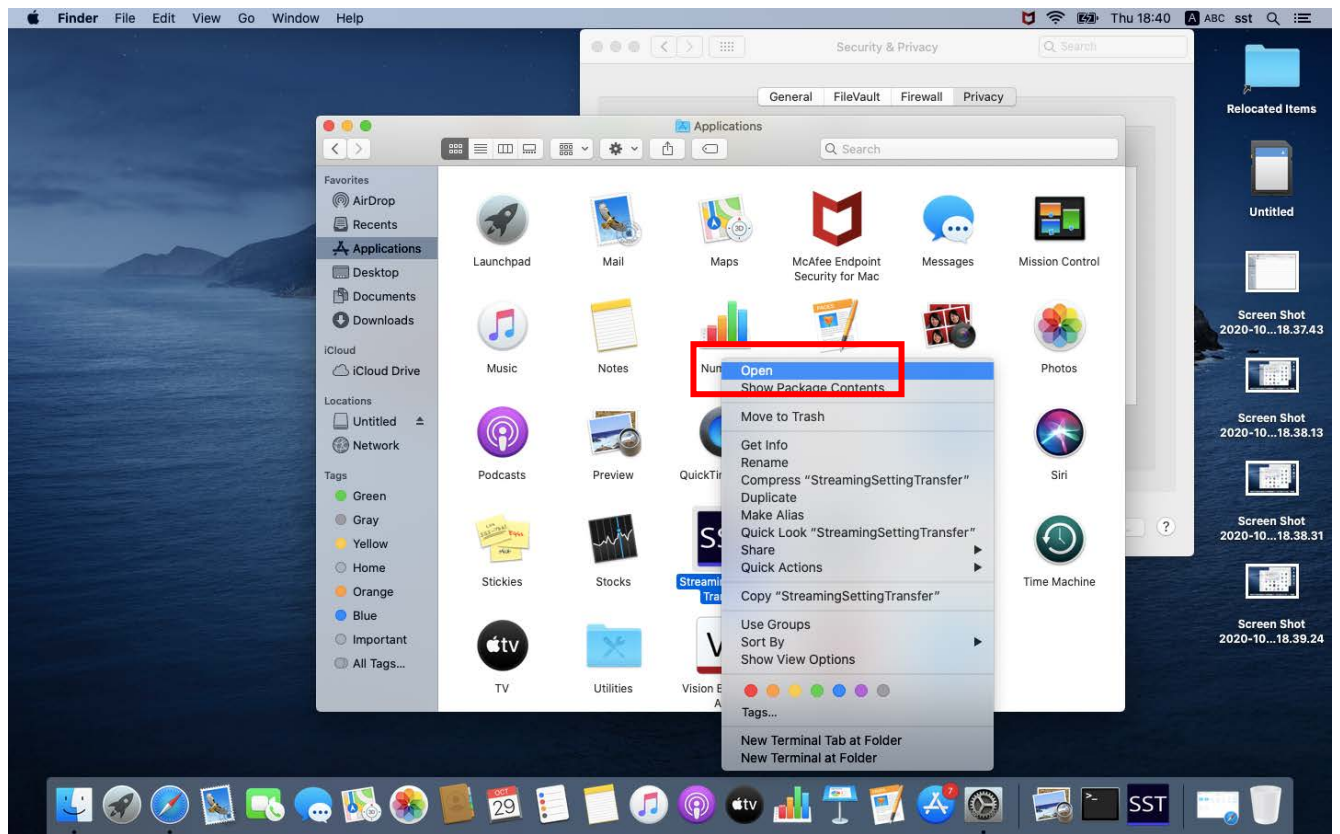

memory.

Then, please move the decoded StreamingSettingTransfer.app under “Application” folder. If the dialogue requiring the administration authentication is displayed, push “Authenticate” and input the administration account information. From then, it can be started by the general user.

If StreamingSettingTransfer.app is started for the first time, click “StreamingSettingTransfer.app” pushing the ”Control” key, then select “Open”. This operation is required only in the first start. From then, it can be started in the normal application start method.

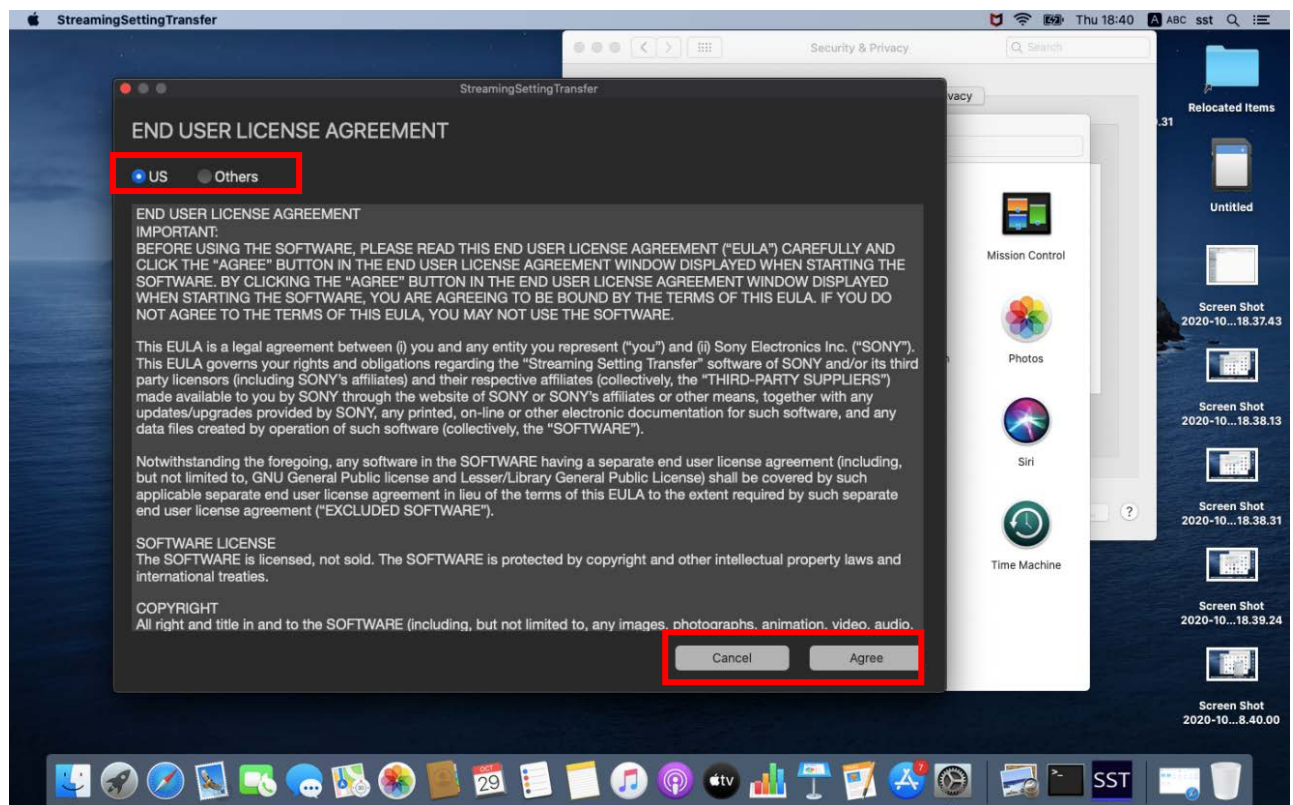

- ※ You can start up “StreamingSettingTransfer.app” with general user authenticity from anywhere without moving it to “Application” folder, but in this case, “END USER LICENSE AGREEMENT” is displayed by every startup.

### 【The operation in the “END USER LICENSE AGREEMENT” window】

If the downloaded StreamingSettingTransfer is run for the first time, or “Agree” button has not been pushed in the “END USER LICENSE AGREEMENT” confirmation window, “END USER LICENSE AGREEMENT” confirmation window is displayed.

Please select region here, US or Other region, read END USER LICENSE AGREEMENT to the end, and push “Agree” button if you agree to it. Then, the main window of the StreamingSettingTransfer is started. If you disagree with it, select “Cancel” button. The startup of StreamingSettingTransfer is canceled.

- ※ In the case of using Mac edition, the dialogue to ask you to permit for it to access the Removal Media may be displayed at the time to switch from “END USER LICENSE AGREEMENT” confirmation window to main window. In this case, please permit it by selecting “OK” button. If “OK” has not been selected by some mistake, please throw StreamingSettingTransfer.app to the trashcan, and retry from first step.

### 【How to display HELP window】

After main window has been started, you can confirm the operation after that by referring to the “HELP”. Please follow the below procedure about how to display “Help”.

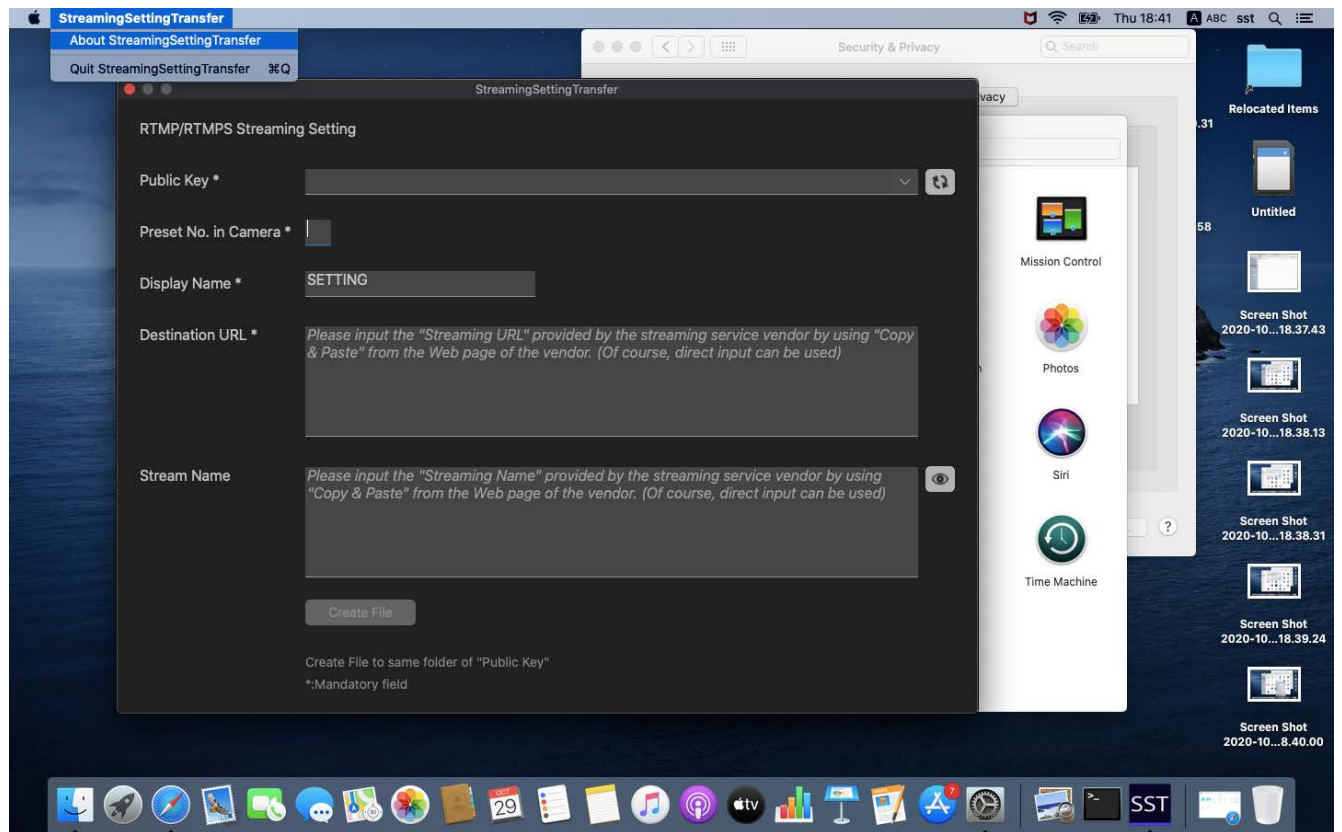

#### ○Windows edition

“Application Information” window is displayed by push “?” located on the right of the menu bar. Please push “HELP” button in the bottom right of the window.

#### ○MacOS edition

“Application Information” window is displayed by selecting “About StreamingSettingTransfer” from the “StreamingSettingTransfer” on the upper left of PC screen. Please push “HELP” button in the bottom right of the window.
